## Beltsville (Md.) Station to be made model for Country

The experiment Station of the United States Dept. of Agriculture at Beltsville, Maryland, is to be a model for the entire country through the purchase of an additional 1000 acres of land and the construction of new buildings costing \$1,750,000.

The Animal Husbandry Laboratory will provide one million square feet of floor space for laboratories dealing with animal nutrition, genetics, meat and wool investigations. The poultry nutrition laboratory will provide facilities for killing and plucking poultry and quick freezing of poultry, also facilities for the study of

cold storage of eggs. The new Dairy Industry building will permit the manufacture of dairy products and by-products on a factory scale.

• • •

On March the 9th there will be held in Washington the first hearing arranged in the Seed Industry to foster better and more profitable conditions. A hearing with reference to a proposed Marketing Agreement for Redtop under the provisions of the Agricultural Adjustment Act. If successful this agreement will undoubtedly mean a sharp advance in the price of Redtop.

• • •

Milk production in the United States on February 1st was more than 9% less than on February 1st last year.

## Around The Stove.

The Virginia Dept. of Agriculture recommends that potato growers not increase their acreage this year but rather their acre yield.

1. Plant only such land as will produce 50 barrels No. 1 potatoes per acre.
2. Turn under green manure crop.
3. Use certified seed.
4. Lime - Soil reaction should be between p H 4.8 and 5.3
5. Fertilize adequately.

Bags not returnable.
